

- Electrically actuated valves
- Performance optimised sizes
- Minimal width
- High flow rates
- Low power consumption

Solenoid valves CPE, Compact Performance

Features

Function¹⁾

1) 3/2-way, e.g. with external pilot air, normally closed

1) 5/2-way, single solenoid, e.g. with external pilot air

1) 5/2-way, double solenoid, e.g. with external pilot air

1) 5/3-way, e.g. with external pilot air, normally closed

- - Width
10 ... 24 mm

- - Flow rate
180 ... 3,200 l/min

- - Voltage
24 V DC
110 V AC
230 V AC

Performance optimised sizes

The solenoid valves CPE, Compact Performance are distinguished by their minimal width and low power consumption at high flow rates.

Can be mounted on site:

- on cylinders,
- on moving system components.
- Choice of installation either individual, top-hat rail or wall mounted.

Micro CPE10, Mini CPE14 and Midi CPE18:

Simple structure comprising compact valve manifolds through modular manifold blocks.

Possible combinations → 2 / 2.1-58

Shorter tubing lengths with minimal air volumes:

- fast switching times
 - quick reaction times
- Optimised installations:
- shorter machine cycles
 - larger quantities
 - low power consumption

Convenient manual override

A current reduction function has been integrated in the KMYZ-9 plug socket for sizes Micro CPE10 and Mini CPE14.

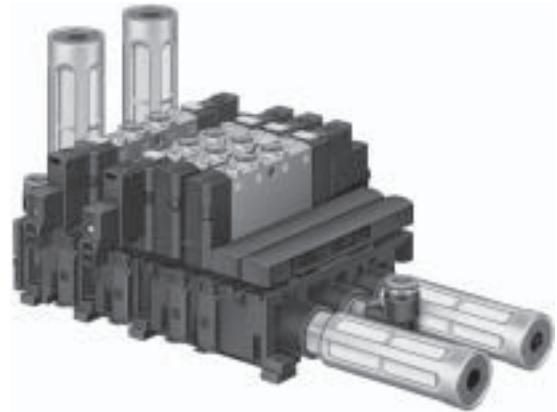

Solenoid valves CPE, Compact Performance

Features

FESTO

Manifold assembly for Micro CPE10, Mini CPE14 and Midi CPE18

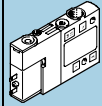

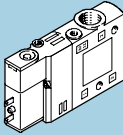

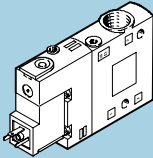

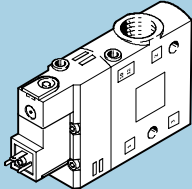

- From individual valves through to compact valve manifolds thanks to modular sub-base systems made from high impact, fibre glass reinforced polyamide.
- Different pressure zones can be implemented with closed PRS channels in basic and expansion blocks.
- Supply and exhaust air can be connected at both ends with connections on basic and end blocks.
- Supply and exhaust air can be connected at the end block, both from the side and from the top.
- No screws required for mounting thanks to quick connecting clips.
- Possible combinations

 Note

Maximum 6 valve positions per air inlet.

Use valve connection blocks in combination with 5/2 and 5/3-way valves only.
